Dynamic Reader **Vision Therapy PROGRAM**

At STRACHAN EYECARE we are now pleased to be able to offer the **Dynamic Reader (ADriNet)**, a computerised Vision Therapy program.

The **Dynamic Reader** is a home Vision Therapy program designed to improve **reading eye movements, reading fluency** and **comprehension**.

The **Dynamic Reader** is designed to be used at home on a daily basis, for about 20 minutes per day, 5 days a week and is suitable for students from Grade 1 level through to upper secondary. Older students are generally able to work reasonably independently on the **Dynamic Reader program**.

The home program has an initial life of 150 runs. If, however, further therapy is necessary after the original 150 runs have expired, it is possible to secure access to another 150 runs (at no extra charge).

We are happy to provide a no obligation trial of the **Dynamic Reader** in-office at either of our practices.

The cost of the Dynamic Reader program is \$205.00 which includes the in-office delivery session.

As you work through the Dynamic Reader program at home, we recommend regular in-office reviews, generally every 4 to 6 weeks. There will be an additional \$30 programming fee at these visits.

Minimum computer requirements for running the **Dynamic Reader** program:

- Windows 98, 2000, and XP with 32 Meg Ram, Colour Monitor and CD Drive
- Macintosh Classic 9.2 and Macintosh OS X 10.1.5 or higher, 10.2.6 or higher, and 10.3 or higher.
- Apple Mac Compatible.
- Can be used on multiple computers using USB or disc to transfer across.

For further information you can visit the website (refer to ADriNet):
